

VECTRA™ BUILT PROUDLY BY WINNEBAGO INDUSTRIES

NOW THE GOOD LIFE IS YOURS TO ENJOY

You've traveled far to get where you are. And now it's time to reap the rewards. To live life fully at your own pace, in a direction of your own choosing. Whether it be mountain vista, desert plateau or ocean shore, Vectra will take you there. Comfortably. Stylishly. Conveniently.

Vectra. An eye-catching new basement-storage motor home that makes charting your own course pure pleasure. Three spacious, full-size models in all -

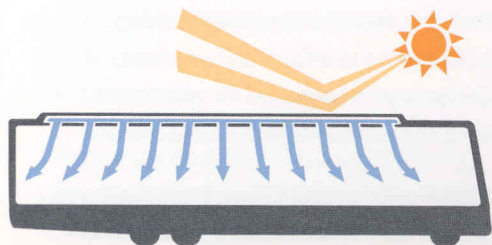

including a diesel pusher - each designed and crafted to the highest standards of Winnebago Industries.

Stroll around the crisp, clean, bus-style exterior. Step into the beautifully-appointed Home Comfort Design interior. Inside and out, intelligent engineering and full-feature performance abound. That's Vectra. A motor home offering a good deal more than comparable Class A models...at a price that's a good deal less.

Discover the all-new 1993 Vectra. And get ready for the time of your life.

VECTRA™

Smartly designed in every detail, Vectra offers many surprising extras. The available patio entertainment

center includes a large pull-out picnic table, stereo system and TV connections to enhance leisure time enjoyment. The four-inch thick roof, featuring extra insulation for all-season comfort, houses front-to-back air conditioning ductwork with multiple ceiling outlets.

On the 37RW and 35RQ rear pusher models, a revolutionary new below-floor central air system provides plenty of cool air that's evenly distributed through the ceiling ductwork. Rugged Thermo-Panel®

fiberglass sidewalls are accented by handsome graphics above and stylish, ribbed valance panels below.

Gas strut-assisted doors on the multiple exterior storage compartments swing up and out of the way for easy access.

AMBROSIA

APPALOOSA

SWAN LAKE

NO MATTER HOW FAR YOU TRAVEL, IT'S SO CLOSE TO HOME

If Vectra looks like home from the outside, it feels like home on the inside. Thick carpeting cushions your feet as you enter the luxurious interior. Plush upholstery in rich fabric hues heightens the residential ambiance. Gorgeous cabinetry lines the walls. While expansive, deep-tinted windows lend an airy mood.

From front to back, Vectra cradles you with the amenities of the good life. Everywhere you look there's evidence of an ingenious use of space. And an obvious, overriding emphasis on craftsmanship.

Years of motor home building experience and a finely-honed knowledge of RVers' needs have produced a vehicle with all the space, efficiency and attention to detail that experienced travelers expect.

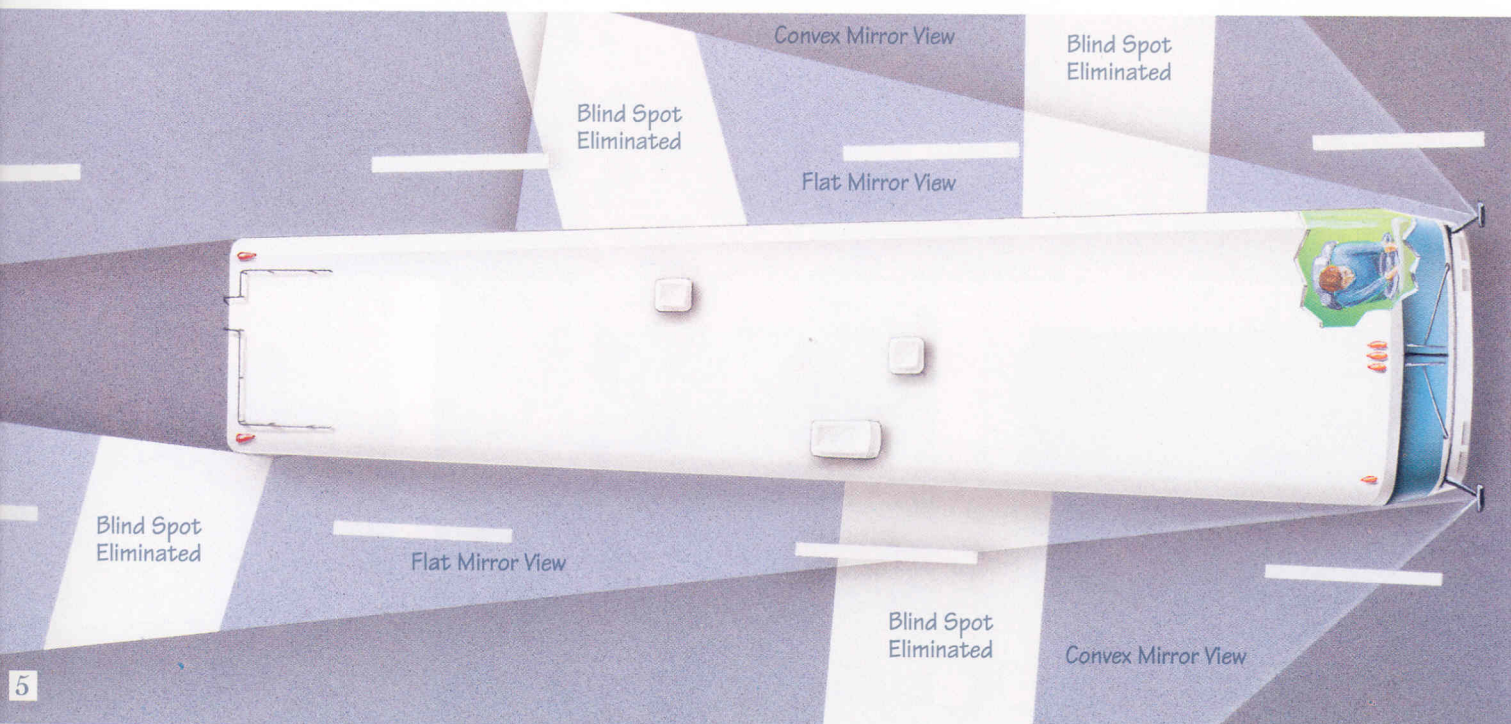

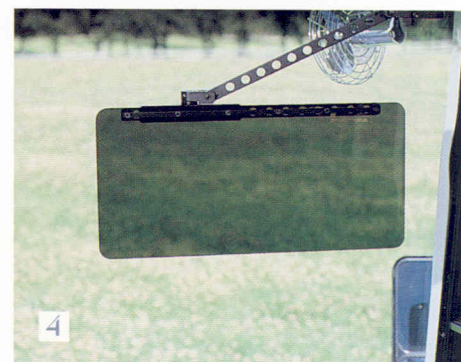

At Winnebago Industries, we call the concept Home Comfort Design. You'll simply call it home.

1 The inviting environment of the spacious Vectra 37RW is a synergy of comfort and style. Located above the crowned, padded vinyl ceiling, the central A/C ductwork maintains ideal climate control.

Beautiful cabinetry with adjustable shelves accommodates a wealth of storage. A special 100% stain-free carpet with pad and the optional oak plank galley floor add to the luxurious ambiance.

All fabrics and carpet are treated with Scotchgard Protector™ for easy care and long-lasting beauty.

2 From the wrap-around panoramic windshield with wide-sweep pantographic wipers to the pull-out sleeper sofa, Vectra makes traveling pure pleasure. The exceptionally comfortable high-back driver and

VECTRA™

passenger seats swivel to join the lounge. And there's no step up to the cockpit since Vectra's floor is flat from front to back.

Entertainment is provided by the easy-viewing, corner-mounted optional 19" color TV. The optional CR and switching system are housed in a tinted, glass-doored upper cabinet. Translucent day-nighter blinds adjust from semi to total privacy.

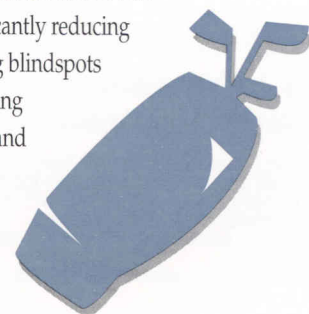

3 The newly designed automotive-class dash puts full instrumentation right at hand. Features

include cruise control, 4-speaker AM/FM cassette stereo with optional remote-control CD player, and twin overhead map lamps.

Driving ease is enhanced by large, easy-to-use rocker switches and an angled-in dash section containing the rear monitor and stereo systems.

4 For exceptional protection from sunlight and glare, Vectra features these special multi-position, smoke-tinted sunvisors and an extra-deep windshield shade band.

5 Vectra's forward-mounted rearview mirrors increase driving safety and convenience versus side-mounted mirrors two ways: by significantly reducing vision-restricting blindspots and by minimizing necessary head and eye movement.

GOING THE DISTANCE IN COMFORT AND CONVENIENCE.

The beauty of Home Comfort Design lies more than in skin deep; it encompasses those many convenience features that make traveling both comfortable and carefree. When you're miles from home on the open road, Vectra's accent on function becomes its inner beauty.

Consider...a fully-equipped galley that leaves nothing to be desired. A spacious master suite that's a perfect fit for a queen. A bathroom that may be the most logically and pleasingly designed on the road today. And loads of storage throughout, located exactly where you need it most.

It's all part of Vectra's lifestyle interior design...for a lifetime of traveling pleasure.

VECTRA

1 The stunning angled galley of the 37RW opens up a new dimension in contemporary galley design. Features and popular options include a low-mounted microwave/convection oven, large refrigerator/freezer with smoke-glass doors, 3-burner range top with high-output burner, thermal carafe coffemaker, Everpure® water purifier system, dishwasher, and an abundance of oak-doored cabinetry. There's plenty of countertop work space, increased by flush-mounted sink and range covers.

2 Be it full course meal or mid-day snack, Vectra's charming home-style dinette serves travelers well. The handsome oak table features a convenient, self-storing leaf that expands elbow room to the fullest. Comfortable twin swivel chairs with oak armrests and an expansive window view complete this practical ensemble.

3 Winnebago Industries' attention to detail is readily evident by the overhead electrical cabinet, located within arm's reach above the microwave oven.

4 Luxurious and comfortable, the Vectra 37RW's spacious master suite invites travelers to enjoy a restful night's sleep. Features include a walk-around queen bed with Sealy Posturepedic® mattress, twin nightstands and reading lamps. Beautiful, coordinated window treatments, comforter and pillow shams highlight the lovely decor.

Behind sliding mirrored doors is an expansive, full-width walk-in-style closet that can accommodate even four-season wardrobes. There's also a separate TV

storage cabinet with drawers below - and the bed lifts for access to even more storage!

5 The contemporary bathroom of the 37RW rivals the openness and luxury found in the baths of many modern homes. A roomy, glass-enclosed shower with skylight and 3-bar towel rack, multiple storage cabinets and drawers, large oval sink, and a convenient second water pump switch enhance the enjoyment of traveling in Vectra. All of this is conveniently located across from the separate makeup table/closet area.

6 There's no more waiting for the vanity until your spouse is through toweling off! Luxury features include makeup lights, padded vanity stool and twin wardrobe closets with ample drawer space below.

7 For your evening entertainment, Vectra's master suite can include an optional remote control color TV conveniently located in a corner-mounted cabinet. The optional AM/FM auto-reverse cassette stereo system with alarm clock makes a soothing nap time addition. There's even a handy extra generator switch.

VECTRA 33RQ - FULL-SIZE COMFORT IN A MID-SIZE PACKAGE

Step inside the Vectra 33RQ, and you'll be astonished by the creative use of space. From cab to bedroom suite, elbow and leg room prevail in an atmosphere of uncompromised luxury and comfort.

With the 33RQ, you may discover that a mid-size motor home is all you need...to live the good life to the fullest.

1 The living area and cab of the 33RQ surrounds the traveler in an environment of luxurious comfort,

style and convenience. The attractive Appaloosa decor group is shown above.

2&3 The 33RQ's enclosed, single-side bathroom has been acclaimed for its modern and spacious design. Luxuries include multiple mirrors, makeup lights, lots of storage, towel racks and a large shower with molded shelves and skylight.

4 The beautifully appointed 33RQ bedroom features roomy mirrored closets, overhead oak-doored cabinetry, convenient twin nightstands, and a queen

or twin bed configuration. The attractive bedroom decor is different with each decor group, something competitive units don't always offer.

5 There's plenty of room for his and hers in the full-height aisle wardrobe, featuring travel-secure drawers, overhead shelf, and sliding mirrored doors.

6 Convenience rules in Vectra's galley, with a handy utility tray below the sink, pull-out cutting board, flush-mounted sink cover, water purifier, thermal carafe coffee maker, and a wealth of spacious cabinetry.

"Posi-Steer" steering provides a tighter turning radius and greater resistance to steering wheel jerking when a bump is encountered. The steering column includes both tilt and telescope functions.

Wide track stability and a quiet ride are benefits of the strong leaf-spring suspension at all four corners. Mylar strips are inserted between each spring leaf to minimize friction and suspension noise.

5.9L turbo-charged and after-cooled Cummins diesel engine offers fewer moving parts and lower operating temperatures for increased engine life.

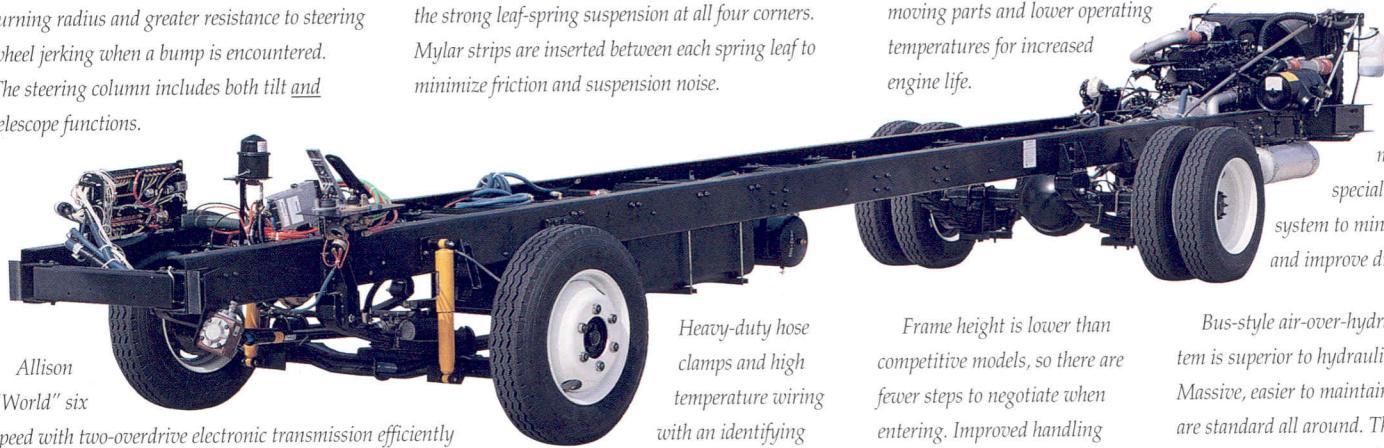

The engine is mounted with a special four-point cradle system to minimize vibration and improve driving comfort.

Allison "World" six speed with two-overdrive electronic transmission efficiently transfers the engine's powerful torque for easy grade climbing, passing and driveability.

Heavy-duty hose clamps and high temperature wiring with an identifying description every three inches are other special Vectra pusher chassis features.

Frame height is lower than competitive models, so there are fewer steps to negotiate when entering. Improved handling and fuel economy also result from this design.

Bus-style air-over-hydraulic brake system is superior to hydraulic-only systems. Massive, easier to maintain 15" disc brakes are standard all around. The parking brake is a spring-applied, air-release system as used on heavier coaches and trucks.

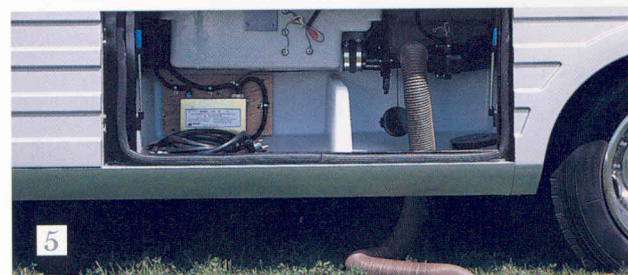

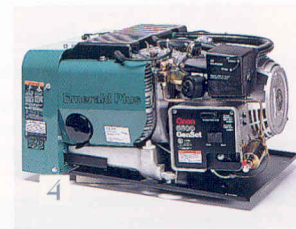

35RQ PUSHER DIESEL CHASSIS-A CUT ABOVE

The 35RQ Vectra features a special Spartan 230 H.P. rear-engined chassis. Because of its efficient diesel engine and large fuel tank, traveling time between

fill-ups can be longer. With the engine located in the rear, there's less noise up front when traveling and no engine cover, making access to the cab easier. There's

also a Spartan owners club for direct access to the chassis manufacturer. Special features like these set the Vectra 35RQ Pusher apart from the competition.

AT THE CROSSROADS OF FORM AND FUNCTION

From front to rear, Vectra's exterior features are designed to integrate and operate beautifully. The closer you look at Vectra, the more you'll recognize that it could only have been engineered by Winnebago Industries.

1 Vectra features a wide, solidly-constructed driver's door with power window. Standard equipment and popular options include 6-way power-adjustable captain's seat, leather driver and passenger seats, electronic touch-pad leveling jack system, C.B.

prep kit, stainless steel wheel liners and heated remote control mirrors.

2 On the 33RQ queen bed model, the large underbody storage compartment can be easily accessed through a locking exterior door. A detachable, storable ladder and a roof-mounted luggage rack are standard on all models.

3 Abundant is the only word for Vectra's exterior storage space. Pass-through compartments line the outside from fore to aft, with easy-opening, gas strut-

assisted doors that swing all the way up out of the way. All exterior storage compartments are lighted and lined for easy loading and extra protection.

4 A number of generators are available, including the quiet-running 6500 watt Onan model shown here.

5 Vectra's holding tank area is heated and includes easy-access valves, a practical plastic floor and a trap door to enable extended use with the main door closed. A handy pull-out shower ideal for quick clean-ups comes standard.

VECTRA. THE LATEST EXAMPLE OF WINNEBAGO INDUSTRIES' COMMITMENT TO INNOVATION AND A QUALITY MOTOR HOME EXPERIENCE.

A STRONG HERITAGE

For more than thirty years, Winnebago Industries has been the RV innovation leader. No other motor home manufacturer has contributed so much to the industry. It began with trailer manufacturing in 1958, followed by the introduction of the famous Brave motor home in 1966, and has continued through numerous vehicle and feature innovations during the '70s and '80s. The new Vectra line is the latest addition to this heritage.

It all begins at Winnebago Industries' production facility, the largest in the industry, in Forest City, Iowa. Here motor homes are designed from scratch, using the latest in Computer Aided Design technology. The majority of components used are developed and manufactured in-house, providing higher quality and the ability to design components that best fit the need, rather than making off-the-shelf items fit the vehicle.

Examples of this include the welded steel cab and coach floor support structure, furniture, cabinetry, holding tanks, windows and the strong and efficient Thermo-panel sandwich wall and roof structure. An extensive testing facility ensures that each new model provides the long-lasting durability and resale value Winnebago Industries motor homes are known for. It's a total commitment no other manufacturer can match.

Free factory tours of this impressive operation are available year-round. The Winnebago Industries Visitor's Center, where tours originate, includes a display on the history of motor homing as well as current models available for inspection. Stop by the next time you're in the North Iowa area. Please call (515) 582-3535 for more factory tour information.

WINNEBAGO - ITASCA TRAVELERS

Every Vectra owner is invited to join the Winnebago-Itasca Travelers (WIT) Club. As a member of the WIT Club, you can take advantage of special services like the WIT Club News Magazine, professional trip routing and mail forwarding.

You'll also meet others who share your enthusiasm for the motor home experience at local WIT rallies, caravans and hundreds of other events throughout North America. The largest gathering is the Grand National Rally in Forest City, Iowa where WIT members come together to enjoy name entertainment, seminars, craft activities and other programs. For more information on the WIT Club, see your Vectra dealer or call (515) 582-6874.

PREFERRED CARE & EXTENSIVE WARRANTY - WITH YOU DOWN THE ROAD

PREFERRED CARE & EXTENSIVE WARRANTY - WITH YOU DOWN THE ROAD

Included with every new Vectra is Winnebago Industries' Preferred Care Program, which provides service assistance through a toll-free phone number, anywhere in the U.S. and Canada for the first year of ownership. It's staffed by experienced service professionals who are available 24 hours a day, year-round, to dispatch emergency road service and towing help, to answer service questions and to provide access to over 20,000 prequalified service locations, including Winnebago Industries dealers. After the first year, the Preferred Care Program can be extended through the Winnebago-Itasca Traveler's (WIT) Club.

Vectra is covered by Winnebago Industries' extensive warranty coverage, the most comprehensive in the business. The standard warranty protects each Vectra for a full 12 months or 15,000 miles. Following the expiration of the standard warranty, extended coverage on structural components continues to 36 months/36,000 miles from purchase date, whichever comes first. Roof and sidewall surface materials have 10 year limited warranty coverage for the first owner, and the 100% stain-free carpeting carries an extensive package of fade, stain and wear coverage. See your Vectra dealer for more information on this complete warranty package.

and hundreds of other events throughout North America. The largest gathering is the Grand National Rally in Forest City, Iowa where WIT members come together to enjoy name entertainment, seminars, craft activities and other programs. For more information on the WIT Club, see your Vectra dealer or call (515) 582-6874.
